### DETAILED ACTION

1. The request filed on 9-20-02 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/174,461 is acceptable and a CPA has been established. An action on the CPA follows.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English.

3. Claims 1-7 and 25-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Moreton et al., US 5,835,133.

Re claims 1-7 and 25-31, Moreton discloses the same camera and method as claimed:

a plurality of image pickup means for picking up a plurality of images of an object reads on (90, fig. 2A i.e., the optical paths of receiving left/right images);

display means for displaying images...reads on (330, figs. 8A-8C);

recording means for recording images picked up by said plurality of image pickup means...reads on (col. 3, line 14, col. 6, line 59+, col. 12, line 40+);

memory means for use both as a display buffer...and as a recording buffer...reads on (720, fig. 8C, see also col. 12, line 58+).

Claims 2-3 and 26-27 read on (720, fig. 8C, see also col. 12, line 58+).

Claims 4-7 and 28-31 are inherent in Moreton for the following reasons. In Moreton, inverted read/write operation is dependent upon whether reflector pairs (30a, 30b, figs. 3-5) are used. Without the reflector pairs, images are read in inverted form (inherent). With the reflector pairs, images are read in normal fashion since the images are inverted by the reflector pairs. Writing in inverted or normal fashion is directly dependent on whether images are read in inverted or normal fashion.
